

Keyboard Protector User Manual (en)

1. Product Introduction

The keyboard protector is a thin, flexible layer designed to cover the surface of your keyboard, protecting it from dust, liquids, and fingerprints. It is generally compatible with specific keyboard models, ensuring cleanliness and extending the keyboard's lifespan.

2. Product Features

- **Dust and Waterproof:** Effectively prevents dust, water, and other small particles from entering the keyboard, prolonging its lifespan.
- **Durable and Resilient:** Made from high-quality silicone or TPU material, it is wear-resistant, soft, and resistant to deformation.
- **Easy to Clean:** Can be washed directly with water and air-dried, keeping the keyboard hygienic.
- **Comfortable Feel:** Soft to the touch, providing a comfortable typing experience without affecting key functionality.

3. Instructions for Use

1. **Clean the Keyboard:** Before use, make sure the keyboard surface is free from dust, oil, or other impurities.
2. **Align the Protector:** Place the keyboard protector flat on the keyboard, aligning it with the keys.
3. **Gently Press Down:** Press the protector lightly to ensure it fits well on the keyboard and does not interfere with key usage.
4. **Check and Adjust:** Make sure all keys can be pressed normally. If necessary, slightly adjust the position of the protector.

4. Cleaning and Maintenance

- **Regular Cleaning:** It is recommended to remove the protector every 1-2 weeks, clean it with water or a mild detergent, and let it air-dry.
- **Avoid Sunlight Exposure:** Do not expose it to direct sunlight to prevent material aging.
- **Avoid Stretching:** Avoid pulling or stretching the protector during use to prevent deformation or damage.

5. Precautions

- **Not Heat-Resistant:** Avoid exposing the protector to high temperatures to maintain material quality.
- **Careful Installation:** Do not stretch the protector excessively to prevent deformation.
- **Compatibility:** This product is generally compatible with specific keyboard models but may not be suitable for customized keyboards.

Thank you for choosing our keyboard protector! We hope it provides optimal protection for your device.
